The following is an examiner's statement of reasons for allowance: the method utilizing a doped copper layer recited in the claims fail to be taught by the prior art cited of interest. Farrar et al teaches forming a trench with a metal layer and then utilizing a copper metal dopant. The trench however is filled with aluminum instead of copper and there appears to be no electroplating. Though Farrar teaches annealing and thereby allowing the metal dopant to come out of the solution he shows nor mentions the formation of a capping layer or the formation of said dopant at a planarized surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Cancel claims 15-19.

Art Unit: 2815

Applicant's election of claims 1-14 in the reply filed on 10-14-2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Accordingly non elected claims 15-19 have been cancelled so that this application may be passed to issue.

Any inquiry concerning this communication should be directed to S. V. Clark at telephone number (571) 272-1725.
